

TS-D1720C

Absolute fidelity to musical sources takes form from speakers that reproduce the ambience in which sounds originate. Stage size, musicians' movement, aural reflection and other distinctive details all bring these sounds to life. Pioneer D-Series speakers are available in 2-way component packages or 2-way coaxial designs in multiple sizes that fit most vehicles.

TS-MR1640

Whether you're out on the water or at the dock, this 6-1/2" two-way speaker adds a new dimension to your boat. It's built specifically for marine use, with heavy-duty construction inside and out that strenuously resists water, corrosion, heat, and sunlight.

TS-MR2040

This is marine audio at its best. This 8" two-way speaker is built specifically for marine use, with heavy-duty construction that strenuously resists water, corrosion, heat—and boring music. Pioneer research showed that more bass is required for boating applications, and this 8" size delivers.
